Integrated Prevention and Care Plan

• CDC/HRSA Integrated Planning Guidance Released Summer 2015
  • Summer 2015 – The Florida Comprehensive Planning Network (FCPN) established writing team comprised of stakeholders from across Florida (cross sections Prevention, Care and Surveillance)
  • Fall 2015 - Statewide planning meetings are combined with PPG/PCPG
  • February 2016 – Writing Team presents draft plan to FCPN for review

• July 2016 – FCPN approves the final version of the plan and runs 2017-2021 (Florida’s 1st integrated plan)

• Integrated strategies/activities have increased cross-section collaboration within HIV/AIDS Section

• FCPN continues to meet as a combined group while continuing to address specific issues individually for PPG & PCPG
Objective 1.1: By December 31, 2021, increase the proportion of HIV-infected persons who know their serostatus from 87.2% (2015) to at least 90%.

Objective 1.2: By December 31, 2021, reduce the annual number of newly diagnosed HIV infections in Florida from 4,613 (2014) to 4,004.

Objective 1.3: By December 31, 2021, reduce the annual number of HIV-infected babies born in Florida from 6 (2014) to less than 4.

Objective 2.1: By December 31, 2021, reduce the number of HIV-related resident deaths from 878 (2014) to 762.

Objective 2.2: By December 31, 2021, increase the proportion of PLWHAs linked to care (ever in care) from 90% (2014) to 96%.

Objective 2.3: By December 31, 2021, increase the proportion of PLWHAs retained in care from 64% (2014) to 90%.

Objective 2.4: By December 31, 2021, increase the proportion of PLWHAs with a suppressed viral load (<200 copies/mL) from 58% (2014) to 80%.

Objective 2.5: By December 31, 2021, increase the proportion of ADAP clients with a suppressed viral load (<200 copies/mL) from 89% (2014) to 94%.

Objective 3.1: By December 31, 2021, reduce the annual number of newly diagnosed HIV infections in Florida’s black population from 2,024 (2014) to 1,757.

Objective 3.2: By December 31, 2021, reduce the annual number of newly diagnosed HIV infections in Florida’s men who have sex with men (MSM) population from 2,761 (2014) to 2,397.

Objective 3.3: By December 31, 2021, reduce the rate of new HIV infections in Miami-Dade and Broward counties from 45.8 (2014) to 39.7 and 38.6 (2014) to 33.5, respectively so these counties will no longer be in the top three U.S. MSA/divisions with the highest rate of new HIV infections diagnosed.

Objective 3.4: By December 31, 2021, reduce the annual number of newly diagnosed HIV infections in Florida’s Hispanic/Latino population from 1,281 (2014) to 1,112.
