State of Florida
Programmatic Accomplishments - 2007

Jail Linkage Program
- 17 county jail programs tested a total of 28,664 inmates for HIV
- They identified 390 HIV-infected inmates (1.4%)
- 7,656 female inmates were tested
- 138 were HIV infected (1.8%)
- 20,991 male inmates were tested
- 250 were HIV infected (1.2%)

In 2007, we received $500,000 from the legislature to supplement CDC funded jail testing efforts. Of the 28,664 tests done in jails in 2007, 12,949 were done with this money. This money was used as follows:
- 12,949 HIV tests
- 202 identified positives (1.6%)
- 3,591 tests in Broward County
- 1,691 tests in Duval County
- 115 tests in Gadsden County
- 1,413 tests in Hillsborough County
- 2,731 tests in Miami-Dade County
- 842 tests in Orange County
- 2,566 tests in Palm Beach County

If this funding is not renewed, complete or near complete loss of the program would result in Gadsden, Miami-Dade, Broward, Palm Beach, and Orange counties.

Pre-Release Planning Program
- The pre-release planning program is funded by DOH and conducted by the Department of Corrections.
- The program linked 1,136 HIV-infected inmates with services upon release.
- 66% of inmates kept their initial medical or case management appointment.

Minority AIDS Initiative (MAI) Program
These programs provide outreach and educational services to minority populations within their local communities. The main goal of these programs is to identify HIV-positive clients and link them to medical care/services such as ADAP.
- Collaboratively, the seven MAI sites served/enrolled 875 clients in 2007.
- The number of clients enrolled has increased steadily since 2005.
- Of this total, 269 (31%) were clients who were newly diagnosed (within 6 months) and 606 (69%) were clients who had fallen out of care.

Targeted Outreach for Pregnant Women Act
The Targeted Outreach for Pregnant Women Act program (TOPWA) screened over 18,600 high-risk women in the 10 counties with the highest rates of HIV infection. Of those women screened, 15% were enrolled into TOPWA. Enrolled pregnant women receive linkages to services and education to prevent HIV transmission to their babies.

Totals
- Clients Screened 18,617
- Clients Assessed 2,497
- HIV Tests 4,986

The breakdown by race/ethnicity of the women screened and assessed is as follows:

<table>
<thead>
<tr>
<th>RACE/ETHNICITY</th>
<th>SCREENED</th>
<th>ENROLLED</th>
</tr>
</thead>
<tbody>
<tr>
<td>Black</td>
<td>10,557</td>
<td>1,684</td>
</tr>
<tr>
<td>White</td>
<td>2,658</td>
<td>329</td>
</tr>
<tr>
<td>Hispanic</td>
<td>5,147</td>
<td>835</td>
</tr>
<tr>
<td>Other</td>
<td>255</td>
<td>24</td>
</tr>
</tbody>
</table>
